Wind is 3000ft wind at Geraldton (80%)

Direction of wind may be +/- 30 degrees

Wind strength +/- 5 kts

Leeway 3% (in a beam reach) of wind speed

Leeway 2% close hauled and on broad reach

Boat course information is course steered with no account for any variation or deviation

All environmental directions are directions from

-ve long = west

-ve lat = south

Grey colored cells indicate derived data
