

# NAVY MASTERY

**NGN** DRIVE TO PROFESSIONAL MASTERY

## Maritime Mastery

We understand our environment and operate effectively at sea

## Technical Mastery

We master our professions and bring our expertise to the fight

## Social Mastery

We achieve results with and through our people

- 1** The **Navy Mastery Model** is centred around a philosophy of striving for lifelong learning and consists of three core elements: **Maritime, Technical and Social**
- 2** Each element has four levels of competence: Foundation, Intermediate, Advanced and Master. Progression through the levels is not dependent on your rank
- 3** **Professional mastery** underpins your training, development, performance and reporting
- 4** **Navy will help you** towards achieving mastery through acquiring skills, knowledge through learning, practice and mentoring - then applying it intuitively
- 5** **Navy mastery** is your first step. Through your career, you may also move into joint and strategic mastery environments

## Developing our people to fight and win at sea
